## RECOGNISED TREE SPECIES

Trees and vegetation contribute to local amenity and help make our urban environment liveable by ameliorating climatic extremes, improving air quality, providing habitat, reducing erosion and salinity. Future development in the Camden LGA will place significant pressure on existing trees and space for new trees as available land becomes increasingly scarce. This subsection aims to prevent unnecessary tree and vegetation removal and poor tree and vegetation management.

This list is to provide an indicative species palette suitable for planting in public and private open space within Camden Local Government Area (LGA). This list is not limited to those recorded and should an alternative species be identified, the species must be suitable for the intended location and be approved by Councils officers.

The selection of street trees should have regard to the following but not limited to:

1. Utilities (Power/Gas/Water/Sewer/etc);
2. Street lighting;
3. Easements;
4. Driveways and bus stops;
5. Pedestrian crossings;
6. House frontages and set backs'
7. Lateral spread of subject species'
8. Road reserve widths and constraints;
9. Waste service collection
10. Vehicle line of sight; and
11. Cultural and heritage amenity.

# Note: The heights and widths listed should be used as a guide and may differ in different situations.

## NEW STREET TREE PLANTING

**List Objective:** All new street trees planted within Camden LGA are confined to the following list of tree species.

**Application:** Street tree selection is contingent upon potential site constraints. Not all trees listed below will be suitable for every situation. Where a variation to the list is proposed the onus will be on the proponent to demonstrate that an alternate species can reliably perform within known constraints associated with the proposed use and location.
