

Tis' the season to start reducing, reusing and recycling with us!

12 WASTE-WISE TIPS FOR THIS CHRISTMAS

Make the wrapping part of the gift – a scarf or re-usable bag (furoshiki wrapping!)

Need a gift for that person that has everything? Donate to a charity on their behalf or buy an experience!

When catering for Christmas, shop to a list – it helps reduce food waste and over-buying!

Keep it local – buy at the local market or grocer and unpackaged where you can.

Buy quality decorations for your Christmas tree that will last for years or make your own.

Avoid cheap gifts that break. Try secret Santa instead – one or two meaningful gifts each!

Recycle your batteries at your nearest drop off point.
